A 23" SPAN GOODYEAR CLASS TEAM RACER
FOR 2.5-3.5cc ENGINES (A.P.S. CODE G,H)

PLAN VALUE 20p

FUEL CUT-OFF OPERATION

Cut-off wire is clamped to engine mounting plate with aluminium, hold down plate. Pass fuel tubing between the wire and fuselage side. In flight, the wire is held clear of the fuel tubing by means of the trip plate. Application of down elevator pulls this plate block to release the wire, squashing the tubing.
