

Designed by:  
Bill Bertrand

Original was powered by Bertrand's inline twin. Made using two .049 Cox piston/cylinder assemblies, 2 TD venturies, and 2 reed valves. Full house R/C was accomplished by using 8 channel reed and a custom PC board to actuate 4 T05 Micro-Mo motors.

Fox Models (Ft. Smith, Ark.) have announced "Astro-Hog, Jr." which should look a lot like this job.
